1.0 Product description

HA8000 series, is a bi-directional fiber amplifier with high-quality. It can transmit and amplify downlink and uplink signal on one fiber. It offers an economical solution to network operators when utilizing the existing fiber source, upgrading networks and providing bi-directional VAD business.

HA8000 is a assembled flat form can configured flexible, users can specify downlink and uplink wavelength, downlink and uplink amplifier type (BA, LA, PA), output power, gain and amplifier optical port model according to their requirement.

2.0 PRODUCT FEATURE

- Downlink and uplink operating wavelength option:
R/B: downlink Red-Band (1548~1564nm), Uplink Blue-Band (1528~1563nm)
B/R: downlink Blue-Band (1528~1563nm), Uplink Red-Band (1548~1564nm)
C/C: Downlink and uplink are used C-Band (1528~1564nm)
- Downlink and uplink amplifier type (BA, LA, PA) and output optical power to choose
- Three optical ports mode option: Master, Line, Slave
- Perfect RS232 communication interface and SNMP network management function
- APC, AGC, ACC controlled selection
- Low noise, high performance, high reliability
- Excellent P/P ratio

3.0 MAIN APPLICATION

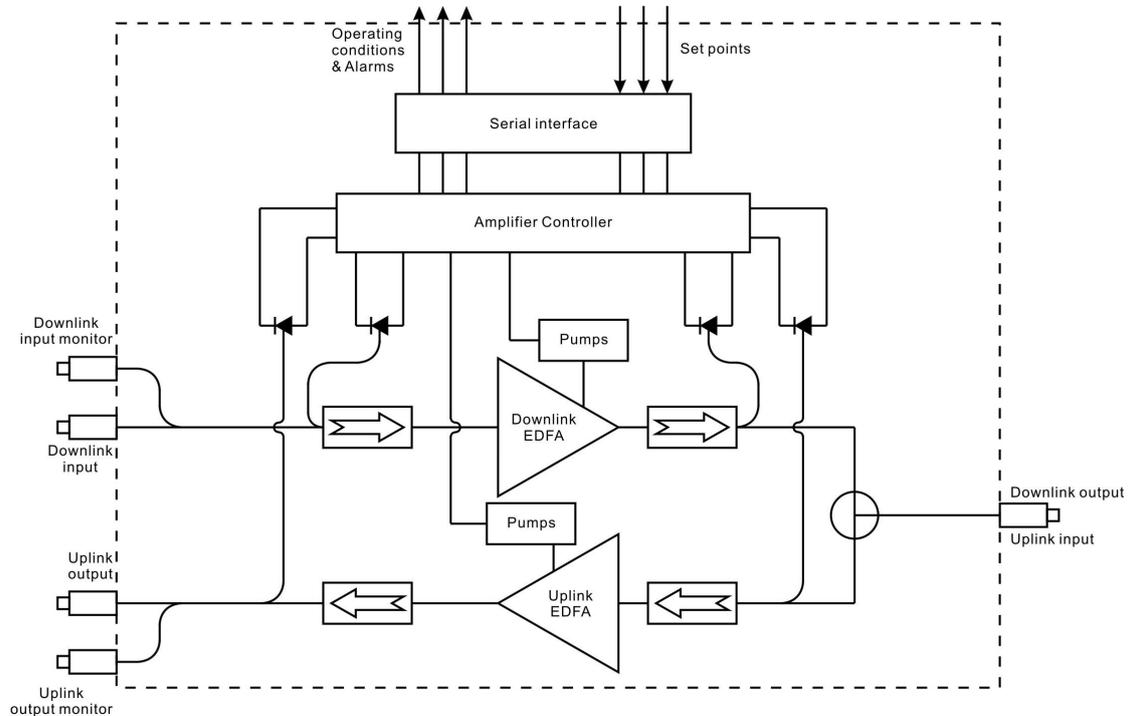

- Single fiber bi-direction DWDM application
- Network upgrade and value-added service
